

STAT Signature

Centralized eSigning
for Hospitals and HIEs

Even in the most sophisticated hospital IT environments, having a single gateway for physicians to view, edit and sign time-sensitive documents is a challenge because of the myriad of document silos created by disparate legacy systems.

An industry-recognized leader in Health Information Exchange solutions, STAT Technologies created **STAT Signature** to solve a Medical Records workflow challenge common to many healthcare organizations.

Service Features

- . Accessible from any Internet-Enabled Device
